

CAREER OR VOCATIONAL ASSESSMENT & COUNSELLING

Approach

My approach to career counseling focuses on values, motivation, interests, personality and the way in which you think and learn. Integrating the assessments results, questionnaires and other data in a holistic way will give us clear guidelines as to the broad fields and/or occupational categories most suitable to your natural cognitive functioning, personal values, worldview and personality, so as to ensure alignment with your prospective career/venture.

Process

The process takes approximately 10 hours to complete. It involves an initial meeting, standardized assessments, completing checklists/questionnaires, scoring, analysis, integration and formal report writing. We will discuss the results, strengths and recommendations for career, personal and professional development during a feedback session to ensure a full understanding of the evaluation and to support some initial decisions on your next steps.

The end goal is to walk away with a plan that includes recommendations that is tailored specifically to you. The value of a comprehensive career assessment is applicable to high-school looking for career direction and potential vocational alternatives. For post-secondary students and adults, it is valuable if you are at a time in your life where you are considering a career or occupational change.

Cost

The flat rate includes professional fees and all assessment instruments, questionnaires, checklists and educational hand-outs.

Discussion of results with a formal report is of **\$1,930**.

Discussion of results without a formal report (verbal feedback only) is **\$1,550**.
